Family visa with valid Iqama | Available for immediate joining | Open to relocation to Riyadh

Professional Summary

Frontend-focused Full Stack Developer with 6+ years of professional experience building data-driven web applications for travel and airline businesses, currently based in Saudi Arabia and working independently as a freelance web developer. Hands-on Angular project experience includes reusable components, Angular Material, reactive forms, Signals, routing and REST API integration. Brings a strong understanding of backend services and business data to frontend development, with experience translating client requirements into responsive interfaces and owning features through development, testing and delivery.

Technical Skills

Angular and frontend: Angular, TypeScript, JavaScript, Angular Material, reactive forms, Signals, RxJS Observables, HttpClient, lazy loading, route guards, HTML5, CSS3, SCSS, responsive design

Additional frontend: React, Next.js, Redux, React Query, MUI, Tailwind CSS, Bootstrap, Backbone.js, RequireJS, jQuery, D3.js, C3.js

Backend and data: Python, Flask, FastAPI, Node.js, Express, REST APIs, PostgreSQL, MySQL, SQL validation, ETL pipelines

Quality and delivery: Angular component testing, Vitest, Playwright, manual and regression testing, API testing, Postman, Git, GitHub, npm, JIRA, Agile, Figma, GitHub Pages

Professional Experience

Freelance Web Developer | Independent | Current

- Focus on frontend web development and continued hands-on delivery of Angular and React applications; selected independent projects are detailed on the following page.

Full Stack Developer

Nucore Software Solutions, India | Nov 2020 - Jan 2026

- Developed responsive business application interfaces using JavaScript, React, HTML, CSS, LESS and jQuery; integrated Python APIs and PostgreSQL data.
- Translated client and business requirements into application features, participated in sprint planning and design discussions, and communicated delivery priorities and issues.
- Owned key modules across development, testing, defect resolution and deployment support within small Agile teams.
- Validated REST APIs, dashboards and ETL outputs through SQL checks and functional and regression testing; tracked defects in JIRA and verified fixes.

Full Stack Developer | Nucore Software Solutions, India | Jul 2015 - May 2016

- Built responsive interfaces with JavaScript, HTML and CSS; contributed Python backend functionality and APIs, and supported application development and deployment.

Professional Project Highlights

Travel BI and SkyTraacs BI: Developed and tested travel agency and airline analytics applications, reporting dashboards and data visualizations. TRAACS and SkyTraacs ETL: Built and validated Python data pipelines supporting BI reporting. Mobile BI App: Contributed a React frontend, Python backend, REST API integration, Figma UI design and interactive analytics.

Angular and Frontend Portfolio Projects

Workforce360 | Angular HR Application

github.com/bushrabuchi/workforce360

Built an Angular application with employee CRUD, detail routes and validated Angular Material reactive forms. Integrated typed HttpClient services with a local REST API. Added Signals-based reporting views, department filtering, CSV export, language and theme services, plus component and Playwright tests. Includes departments, attendance and settings screens; reporting uses sample data.

ProcureAI Admin Platform | Angular Procurement Demo

github.com/bushrabuchi/procureAI-admin-platform

Implemented supplier and purchase-order screens, draft editing, submission, approval and rejection with a required reason and action history. Used Signals and computed state, localStorage persistence, lazy-loaded standalone routes and a demo-session guard. Added component and service tests for the frontend workflow.

ProcureAI Supplier Portal | Next.js and React Demo

github.com/bushrabuchi/procureAI-supplier-portal

Created supplier dashboard, RFQ and quotation pages with demo login and registration. Implemented quotation validation using React Hook Form and Zod, including positive amounts, delivery days and duplicate-submission feedback. Built as a frontend demonstration with local demo state.

Customizable Angular Dashboard | Angular Material

github.com/bushrabuchi/angular-dashboard

Developed a dashboard demo with chart, statistic and table widgets, analytics and settings screens. Included theme management, client-side session handling and route guards using Angular services, TypeScript and SCSS.

Flysmart Ticketing | React and Express Demo

github.com/bushrabuchi/flysmart-ticketing

Built a flight-search and booking demonstration covering traveller details, simulated payment and e-ticket views. Connected the React interface to Express REST endpoints for airports, flights and bookings, with PostgreSQL support and an in-memory fallback.

Travel Website with ML Features | React and FastAPI

github.com/bushrabuchi/travel_website_AI-ML

Created a travel storefront with search and package components and API integration for fare estimates, package recommendations and review sentiment. Included frontend tests and backend integration test code; ML experiments use generated training datasets.

Additional Frontend and Learning Projects

Angular Portfolio: Component-based profile, skills, experience, projects and contact pages (bushra_portfolio). React Admin Dashboard: Learning/demo work with MUI, Redux Toolkit, data grids, charts, calendar and validated forms (react-admin-dashboard-master).

Additional data and academic work: Customer churn prediction, Boston house-price prediction, kidney disease image classification, MLflow experiments, and course projects in predictive maintenance, patient risk and credit risk. College project: Java-based text and image steganography.

Education and Certification

Bachelor of Technology in Computer Science | LBS College of Engineering, Kerala, India | 2015

Data Science and AI | LearnBay | 2024
